As a system, all of the libraries together, we are circulating about 58% of what we typically lend. VPL is at about 68% of normal lending capacity. Projecting out for the end of the year, VPL total circulation will be down, hovering around 64% of what we have averaged in the past few years.

For the VPL, about 64% of what we lend is books. Adult materials make up 64% of our circulations. 64 must be our magic number for 2020.
